

RICHMIX™ BIOCHAR

Remineralized Inoculated Char

Usage: For new seedlings, in the furrow, new plantings, in tillage and in potting or growing media.

Minimum effective rates for new agricultural seedlings: 70 lbs/acre on average, banded or mixed with seed.

For restoration: Use up to 700 lbs/acre broadcast or in hydromulch before or during planting operations. **For planting mixes:** Amend planting mixes with 20-60 lbs./cu. yd. Use the higher rates for plugs and small container seedlings.

Contents: Pioneer Valley Basalt Microfines, 100% pure hardwood char and 4 species of Endo Mycorrhizae (Glomus intraradices, G. mosseae, G. aggregatum, G. etunicatum: 1300 propagules/lb.) **Net weight 25 lbs.**

RICHMIX BioChar has been approved by Maine Organic Farmers and Gardeners Association (MOFGA)
